

Your operations, visual and secure

SIMPLIFY THE MANAGEMENT
OF CRITICAL SYSTEMS
REMOTELY AND SECURELY.

What you can do with C-CONTROL®

- ✓ Visualize any data source.
- ✓ Organize and sequence scenes in real time.
- ✓ Fast, clear management from your browser.
- ✓ Teamwork with roles and permissions.

Your entire data ecosystem in one view

DRAG, ORGANIZE, AND CONTROL EVERY SOURCE WITH TOTAL FREEDOM. FROM A SINGLE BROWSER, ANYWHERE.

With C-CONTROL®, everything you need to see is in one place. Visualize, control, and act from a single intuitive interface.

- ✓ **Dynamic dashboards:** Power BI, Tableau, Grafana...
- ✓ **Web and corporate applications:** CRMs, ERPs, internal systems
- ✓ **Video surveillance:** IP cameras, VMS, real-time visualization
- ✓ **Physical connectivity:** HDMI inputs (NVR, video conferences, computers).
- ✓ **Streams from workstations:** Remote desktops, virtual sessions

The technical heart of your control room.

DESIGNED FOR **24/7 PERFORMANCE** IN MISSION-CRITICAL ENVIRONMENTS.

C-CONTROL® C400 Gen 4

- ▶ Intel i9 Processor
- ▶ 4x 4K Outputs
- ▶ 4x 4K Inputs
- ▶ 64 GB High-Performance RAM
- ▶ 1TB SSD Storage
- ▶ 1 Hot Swap
- ▶ Redundant Hot Swap Power Supply
- ▶ 4U Rack-Mount Chassis with Active Ventilation (3 fans)
- ▶ Windows 11 LTSC 2021
- ▶ Scalable equipment: add disks, memory, output boards, input boards
- ▶ C-CONTROL license with 2 years of software maintenance (SMC)

Organize your video wall with total freedom

Drag, organize, and control every source freely. From a single browser, anywhere.

COMPATIBILITY

Everything that happens, comes on screen

Integrate computers, cameras, NVRs, or decoders. Visualization with no latency or quality loss.

KVM

Your browser is your control room

Interact with content remotely. No extra software, no complexity.

DRAG N DROP

Design your visual environment effortlessly

Create dynamic scenes from the browser with maximum freedom. Your workspace, the way you need it.

STREAMING

Project your digital environment in real time

Stream desktops, virtual sessions, or apps directly to different remote locations.

No cables, no installation.

CUSTOMIZABLE

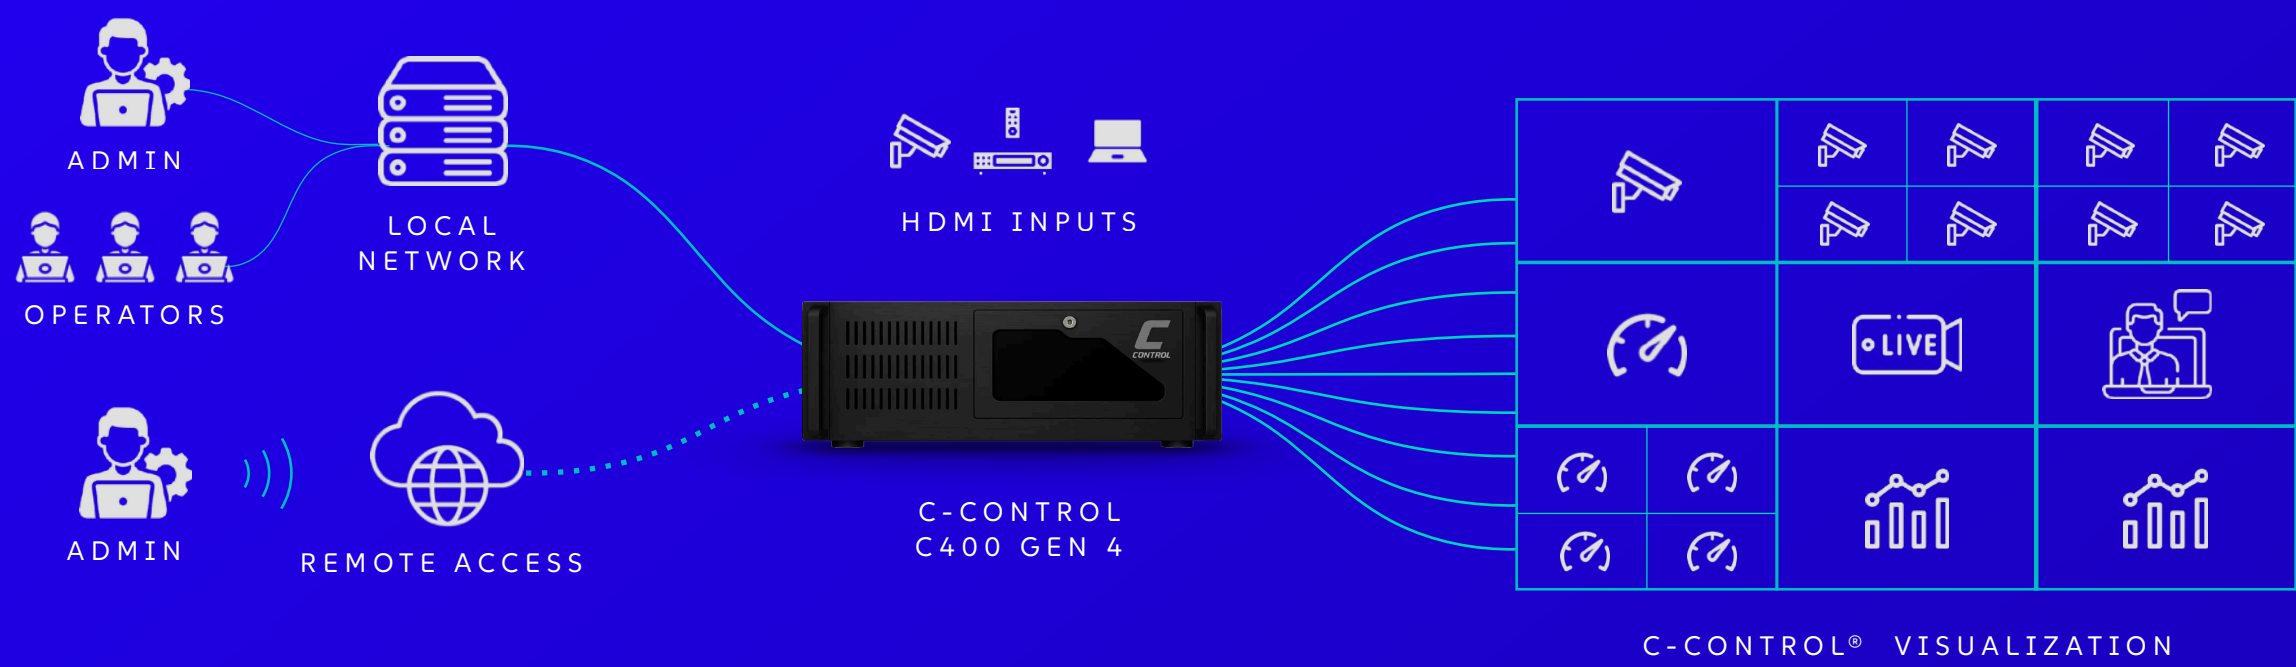

Activate a full environment in seconds

Save and reuse complex configurations. Perfect for shift changes, drills, or critical situations.

Flexible architecture, seamless operations

C-CONTROL® adapts to any type of control room, operational team, or workflow.

Professional visualization without limits

Tailored to each industry to optimize and protect critical operations.

	Industry Comprehensive process monitoring for maximum efficiency and safety.		Energy Supervision of networks and plants to guarantee stable, continuous supply.
	Oil & Gas Centralized control of critical operations in complex energy environments.		Telecommunications Proactive monitoring to keep critical networks always operational.
	Banking Continuous monitoring ensuring availability and security of financial operations.		Airports Unified system control for safe, efficient operations.
	Mining Remote management in extreme environments with high control demands.		Government Centralized management to optimize resources and public services.
	Security Real-time coordination for immediate incident response.		Ports Comprehensive monitoring for safe, uninterrupted logistics operations.

C-CONTROL PRO

AI IN YOUR CONTROL ROOM
Designed to understand and act in real time

C-CONTROL PRO combines advanced visualization with an AI engine that interprets data in real time, enabling automated workflows through nodes, supporting intelligent decision-making without manual intervention.

- ✓ Automatic anomaly detection in visual environments
- ✓ Proactive alerts based on behavior
- ✓ Smart prioritization of critical events
- ✓ Operational efficiency analysis
- ✓ Predictive monitoring
- ✓ Dynamic optimization of the control center
